# GCSE MARKING SCHEME 

MATHEMATICS 2-TIER
SUMMER 2010

## INTRODUCTION

The marking schemes which follow were those used by WJEC for the Summer 2010 examination in GCSE MATHEMATICS - 2-TIER. They were finalised after detailed discussion at examiners' conferences by all the examiners involved in the assessment. The conferences were held shortly after the papers were taken so that reference could be made to the full range of candidates' responses, with photocopied scripts forming the basis of discussion. The aim of the conferences was to ensure that the marking schemes were interpreted and applied in the same way by all examiners.

It is hoped that this information will be of assistance to centres but it is recognised at the same time that, without the benefit of participation in the examiners' conferences, teachers may have different views on certain matters of detail or interpretation.

WJEC regrets that it cannot enter into any discussion or correspondence about these marking schemes.

| 4. (a) Overlay Point E so that $\mathrm{DE}=9 \cdot 8(\mathrm{~cm})$ |  | B1 | Inclusive bounds are shown on overlay. Allow the letter E only to mark the point. |
| 4. (b) Overlay (viewed with diagram) <br> (i) angle $103^{\circ}$ <br> (ii) angle $42^{\circ}$ $\mathrm{AC}=15 \cdot 3(\mathrm{~cm})$ <br> Must be a line from A cutting the given line through B. Their point of intersection is C . If line is a 'dog leg', use part starting at A to decide the $42^{\circ}$ and AC gets B 0 . Generally, use the overlay to check that their line AC is consistent with their value for AC . Otherwise use measuring tool. |  | $\begin{aligned} & \text { B1 } \\ & \text { B1 } \\ & \text { B1 } \end{aligned}$ | Allow $\pm 2^{\circ}$ <br> Inclusive bounds are shown on overlay. <br> F.T. their diagram. <br> If their angle is $40^{\circ} \mathrm{AC}=14.4(\mathrm{~cm}) \pm 2 \mathrm{~mm}$ <br> If their angle is $44^{\circ} \mathrm{AC}=16.0(\mathrm{~cm}) \pm 2 \mathrm{~mm}$ <br> (Interpolate other angles between $40-44$ ) <br> For angles outside this range, use a measuring tool. <br> Note: A straight line drawn from A to end of the line through <br> B , gives $\mathrm{AC}=16 \cdot 5 \pm 2 \mathrm{~mm}$. and gains the $3^{\text {rd }} \mathrm{B} 1$.
